Spencer Park

Solutions Engineer | Technical Consulting · SaaS Implementations · eCommerce Operations
spencerjamespark@gmail.com | 425-471-8046 | Seattle, WA (Remote-ready)

SUMMARY

Customer-facing technical consultant with 7+ years across B2B SaaS, eCommerce operations, and data engineering. Founded and built a full-stack B2B marketplace SaaS; designed fulfillment and post-purchase data systems for eCommerce brands; led consultative discovery with C-suite stakeholders. Owns the full technical sales motion — discovery, solution design, demos and POCs, API/integration validation, and implementation handoff — translating fluently between engineers and business stakeholders.

TECHNICAL SKILLS

APIs & Integrations: REST APIs, webhooks, JSON, Stripe, Shopify ecosystem, POS/CRM/OMS integrations, event-driven workflows, Google Tag Manager

Languages & Web: TypeScript, JavaScript, React, Next.js, Node.js, Python, SQL, C#, FastAPI

Data & Cloud: PostgreSQL, BigQuery, MongoDB, ETL (Spark, Airflow), Tableau, GCP, AWS, Docker, Firebase

EXPERIENCE

Department Lead, Meat & Seafood Nov 2024 – Present
Trader Joe's — Seattle Metro, WA

- Run daily operations for a high-volume perishables department — ordering, inventory, shrink, compliance, scheduling — while customer-facing on the floor daily, resolving escalations and coaching the team.

Technical Business Consultant (Contract) Jun 2024 – Oct 2024
Conscious Hospitality Group — multi-brand restaurant group (Just Poke, Matcha Magic)

- Led consultative discovery with C-suite and operational stakeholders to map business goals, technical architecture, and constraints across brands, then translated requirements into scalable data solutions.
- Unified data flows from POS, CRM, inventory, and fulfillment systems into a governed reporting layer, enabling leadership to analyze pricing, cost, and loss for the first time.
- Advised on SaaS adoption for compliance — assessing technical fit, integration risk, and implementation readiness.

Operations Manager May 2023 – Oct 2024
EatDirt — eCommerce food brand

- Owned end-to-end post-purchase operations for a DTC eCommerce brand: fulfillment facility design, order processing, carrier workflows, and the data architecture tracking all of it.
- Built an ETL pipeline (Python, SQL, BigQuery, Spark, Airflow) integrating storefront, order, and fulfillment data — including slowly changing dimensions for historical COGS analysis.
- Implemented Google Tag Manager and analytics tracking across the digital product; defined KPIs and self-serve reporting for the leadership team.
- Sourced and integrated vendors across packaging, supply, and technology; documented systems in video and writing.

Founder & Full-Stack Engineer Jul 2022 – Dec 2023
Direct Crops — B2B agriculture marketplace & inventory SaaS

- Founded and single-handedly built a B2B marketplace connecting agriculture producers with wholesale buyers, plus a SaaS inventory management system (React/Next.js, Node.js, PostgreSQL, Stripe, GCP).
- Designed and consumed REST APIs and webhook-driven workflows for payments, inventory sync, and order management across the platform.
- Ran the full customer motion solo: discovery calls with producers and buyers, live product demos, onboarding, and feature prioritization from customer feedback.

Event Marketing Specialist (Freelance) Nov 2017 – Jun 2022
Clients: WinStar World Casino, San Francisco 49ers Foundation

- Designed and delivered promotional event strategies end-to-end for enterprise clients — proposals, stakeholder presentations, and on-site execution — contributing to a record $168M weekend coin-in at WinStar's 2019 Black Friday event.

SELECTED PROJECTS

- Stitch Punk — solo-developed RPG/RTS hybrid in Unity DOTS (C#); high-performance ECS architecture for large-scale unit simulation. All code and art self-produced.

EDUCATION

BA, Anthropology & Communications — Western Washington University Dean's List · COMM Dept. Research Assistant
