# Spencer Park

Project & Program Management | Swag, Events, Video, Web
spencerjamespark@gmail.com | 425-471-8046 | spencerjpark.com | Seattle, WA

## SUMMARY

Hands-on project lead across swag, live events, video, and web. Has run thousands of on-site fittings for VIP and donor events, worked day-of operations for concerts of up to 3,500, rebuilt a national brand's tutorial video on a three-day deadline by cutting scope, co-founded a live event series, and co-founded a B2B marketplace.

## EDUCATION

**Western Washington University** | BA, Anthropology & Communications, 2021 — Dean's List, COMM Dept. Research Assistant

## FREELANCE AND INDEPENDENT PROJECTS

**Brand Revolution** | Freelance Video Producer (Contract) — Sep 2026

*Client project: Panera Bread "Bun Bun" crochet kit, sent to creators to drive craft meetups at Panera locations*

- Rebuilt the kit's only instructions, a tutorial video the factory delivered with gray lighting, a robotic voiceover, and half the steps missing. Got the original script from the factory in China and learned basic crochet to rewrite it.
- When the timeline was cut from a month to 3 days, offered a short link to hold the schedule; when the client needed YouTube, cut scope by swapping the booked voice actor for ElevenLabs. Delivered in 3 days (about 15 hours): grade, edit, subtitles, and the QR code in every kit.

**Off Air** | Co-Founder & Promoter, phone-free DJ event series (Seattle) — Mar 2026 - Present

- Run the business side (budget, bookkeeping, venue relations, marketing) and book the DJs, poster artist, lead photographer, and main stagehand.
- Hit 95% capacity at a profitable debut (June 2026) with my promo video, Meta Ads, and street postering. Second show booked for Nov 21.
- Before Off Air, ran day-of operations for hip-hop concerts of up to 3,500 (largest: Trippie Redd): ticketing staff, security briefings, VJ visuals, transporting supplies and building barriers, fire safety inspections, and green rooms set to contract.

**Stitch Punk** | Solo Game Developer, independent project — 2025 - Present

- Building an RPG/RTS hybrid in Unity DOTS (C#) as a one-person studio, with all design, code, and art self-produced around a full-time job.

**Juice Marketing** | On-Site Event Operations (Contract) — 2022

*Client: San Francisco 49ers Foundation, custom jean jacket activation for Foundation donors*

- Two-day donor event at Carmel Valley Ranch with jacket fittings and heat-pressed patches. Helped set up and planned the sizing station.
- Solved a client concern by suggesting the required event patch go on the sizing jackets, so donors saw it first. The client approved.
- Ran order staging to keep jackets matched to donors, took over the heat press, and kept order data clean through a 14-hour first day.

**Three Brothers, Inc.** | Event Operations (Contract) — 2017 - 2019

*Promotional products and giveaway events. Client: WinStar World Casino*

- Black Friday cart dash, brought back three years until COVID: 36 contestants over 12 hours, about $9,300 average haul. The final day in 2019 set a casino single-day record of $168M coin-in.
- Tumi jackets: part of the team that ran 1,400 fittings; kept guests moving and offered options when sizes ran low.
- New Year's Eve gifts: ran shoe fittings for 900 UGGs ($140) and handed out 900 crystal sets ($85).

## OPERATIONS AND TECHNICAL EXPERIENCE

**Trader Joe's** | Department Lead, Meat & Seafood — Feb 2025 - Present

- Run daily operations for a high-volume perishables department: ordering, inventory, shrink, compliance, scheduling, escalations, and training.

**EatDirt** | Operations Manager — May 2023 - Oct 2024

- Built out a DTC food brand's commissary after its seed round: facility design, packaging sourcing, last-mile delivery, vendor coordination, KPI reporting (Python, SQL, BigQuery), and staff training.

**Conscious Hospitality Group** | Technical Business Consultant (Contract) — Jun 2024 - Oct 2024

- Unified Just Poke's POS, CRM, inventory, and fulfillment data into one reporting layer, and interviewed tech vendors for cleaner data.
- Found recipe costs came from a retired menu. Prepped with a franchisee to measure all 26 recipes in vendor units, then built a cost calculator.

**Direct Crops** | Co-Founder — Jul 2022 - Dec 2023

- Co-founded a marketplace for local farms selling to restaurants; built the platform with my co-founder (Next.js, PostgreSQL, Stripe).
- Led outreach at industry events, meeting farmers and restaurant buyers in person and bringing their feedback into the build.

**Bramble Berry Handcraft Provisions** | Inventory / Project Manager — Oct 2018 - Jul 2021

- Reorganized warehouse order assembly and directed fulfillment, production, and distribution teams for a handcraft supply eCommerce company.
- Built logistics metrics and made order assembly 13.6% faster (timed before and after), which helped absorb the COVID sales spike.

## SKILLS

**Project and Production:** budgeting and bookkeeping, vendor and contractor management, on-site event operations, inventory and fulfillment
**Video and Marketing:** video editing and post-production, DaVinci Resolve, Blender CGI, scriptwriting, YouTube, Meta Ads
**Web and Data:** React, Next.js, TypeScript, Node.js, Shopify, Stripe, REST APIs, Google Tag Manager, SQL, Python, BigQuery
